RE: LANGLEY PROJECT  
Drawings -  
Cornerstone Inscription

Mr. L. L. Hunter  
Assistant Commissioner for Design and Construction  
Public Buildings Service  
19th and "F" Streets, N. W.  
Washington 25, D. C.

Dear Mr. Hunter:

We have sent to you by separate first-class insured mail three (3) original paper drawings Nos. 23-1, 23-2 and 23-3. (Cornerstone Inscription).

We have made the revision to the firms' name on Drawing No. 23-3 as requested by Tompkins & Jones and confirmed by [REDACTED] and 23-2. No revisions or corrections were required on Drawing 23-1

STATINTL

Tompkins-Jones referred to a correction required in overall dimensions of the stone. Tompkins-Jones evidently erred in using the terms, "Top of line below" or "Bottom of line above" as match lines. These terms refer to line of letters and if properly scaled will result in 6'-0" overall length of stone.

Tompkins-Jones has suggested that the corner stone be made 3" thick for structural reasons; we assume that this increase in thickness will benefit them in handling and erection and we are agreeable to the increase in thickness with no additional cost. If no additional cost is suitable to Tompkins & Jones, please advise us so that we may initiate an information sheet to revise the details of the back-up concrete wall.

Very truly yours,

HARRISON & ABRAMOVITZ

Carl W. Holmes
